HEALTH CARE/HEALTH SERVICES INDUSTRY EXPERIENCE SUMMARY

Case/Disease Management, Providence Health Plans, Beaverton, Oregon, 2011-present

- Provide care coordination services to Providence Health Plans (PHP) members. Care coordination services include: disease management programs, including educating, motivating and empowering members to manage their disease
- Provide care coordination services to PHP members for asthma, COPD, CAD, CHF, diabetes, ESRD and cancer disease management programs
- Triage and referral, transition of care planning, end of life care planning, other acute and catastrophic case management. These services are offered to members and their families who have acute and complex health care needs; members with chronic conditions at risk for poor health outcomes and members who are terminal and nearing end of life
- Provide patient education, care coordination and general assistance with managing day to day functional needs
- Assist with the management of member health plan benefits and offering assistance finding alternative services when benefits are exhausted
- Work within the health plan framework of managing medical expenses in addition to working to improve access and quality care to our members
- NCQA Project Manager

Medical Management Project Coordinator, ODS Companies, Portland, Oregon, 2009-2011

- Acts as liaison between Quality and Medical Management Department to ensure accreditation standards are in place and being followed
- Communicates with and monitors delegated entities in relation to delegated UM
- Manages UM reports and informs management of contents/findings
- Prepares audit tools, performs file audits, compiles results and identifies areas for improvement
- Provides continuous communication and develops on going, professional relations to internal claims, customer service, professional relations, and appeals departments in order to ensure complete and accurate benefit determination of healthcare services programs is being met
- Assists with staff training on new medical management programs and manages and maintains policies and procedures relating to medical management; up to and including updating medical criteria
- Consults with medical director and physician consultants regarding policies and procedures, medical criteria and investigates the need for new medical criteria and develops policies as needed
- Organizes policies and procedures to be presented at monthly Medical Quality Improvement Committee (MQIC) meeting, including sending agenda items to MQIC members and preparing report for management
- Participates in focused Quality Improvement projects, ambulatory reviews and population health management
- Identifies and utilizes community resources as part of the development of medical criteria and policies and procedures
- Updates and maintains Focus Chart (guideline tool for processing preauthorizations)
- Utilization Review
- Use of Milliman software for preauthorizations and Utilization Review
- Supervisor backup as needed
- Committees
 - AIM Delegation: Facilitator
 - Medical Necessity Criteria Work Group: Co-Facilitator
 - Focus Chart: Facilitator
 - Batch Edit: Member
